FEDERACIJE BOSNE I HERCEGOVINE

ASSOCIATION OF BASIC MEDICAL SCIENCES  
OF FEDERATION OF BOSNIA & HERZEGOVINA

## Editorial

Association of basic medical sciences is gathering the scientist who work in the institutions for fundamental medical sciences as biophysics, biochemistry, biomorphology, physiology etc.

During the war the basic medical sciences lost much more than any other scientific branches. Besides the material destruction and destroyed equipment, there was a complete blockade of the information flow and also shortage of staff.

With establishment of the ABMS we intend to renew relations with the professional medical associations and societies with aim to provide a transfer of knowledge.

The members of the ABMS are determined to start a Scientific Journal where the results of the recent research and studies will be published four times per year, in English language. All members of the Editorial Board will work as volunteers but because of publishing expenses a financial support will be necessary.

Our Bosnian Journal of Basic Medical Sciences has been published since 1998 as first issue, then due to the lack of financial resources next issue was published in 2001, and since then it goes regularly. During 2002 we issued two numbers, during 2003 we issued four numbers and during this year we have already issued three numbers.

BJBMS is officially register with the Ministry of Education of FB&H. It is fully edited in English only, and as it, it is the only biomedical Journal in B&H. One of the main goals of our Journal is to provide young scientists in B&H with a journal through which they can published and communicate throughout the scientific World.

We are pleased to inform you that BJBMS is accepted for indexing in the CAB Abstracts and/or Global Health databases.
